Contents of Volume 190, No. 1

Protein Biosynthesis/Molecular Genetics

Intermediates in the assembly of ribosomes by a mutant of *Escherichia coli*	P. D. BUTLER, P. F. G. SIMS & D. G. WILD	157–170
Resistance of the peptidyltransferase centre of rabbit ribosomes to attack by nucleases and proteinases	R. A. COX & S. KOTECHA	199–214

Protein Turnover

Quantitative importance of non-skeletal-muscle sources of *N*-methylhistidine in urine	D. J. MILLWARD, P. C. BATES, G. K. GRIMBLE, J. G. BROWN, M. NATHAN & M. J. RENNIE	225–228

Metabolism, Regulation and Control Processes

Control of the flux in the arginine pathway of *Neurospora crassa*. The flux from citrulline to arginine	H. J. FLINT, D. J. PORTEOUS & H. KACSER	1–15
The metabolic fate of lactate in renal cortical tubules	P. JANSSENS, R. HEMS & B. ROSS	27–37
Stabilization of adenine nucleotide ratios at various values by an oxygen limitation of respiration in germinating lettuce (*Lactuca sativa*) seeds	P. RAYMOND & A. PRADET	39–44
Oxygen consumption in perfused skeletal muscle. Effect of perfusion with aged, fresh and aged–rejuvenated erythrocytes on oxygen consumption, tissue metabolites and inhibition of glucose utilization by acetoacetate	N. B. RUDERMAN, F. W. KEMMER, M. N. GOODMAN & M. BERGER	57–64
Role of calcium ions in the regulation of intramitochondrial metabolism. Properties of the Ca^{2+}-sensitive dehydrogenases within intact uncoupled mitochondria from the white and brown adipose tissue of the rat	J. G. MCCORMACK & R. M. DENTON	95–105
Role of calcium ions in the regulation of intramitochondrial metabolism. Effects of Na^+, Mg^+ and Ruthenium Red on the Ca^{2+}-stimulated oxidation of oxoglutarate and on pyruvate dehydrogenase activity in intact rat heart mitochondria	R. M. DENTON, J. G. MCCORMACK & N. J. EDGELL	107–117
Evidence that catecholamines stimulate renal gluconeogenesis through an α_1-type of adrenoceptor	P. KESSAR & E. D. SAGGERSON	119–123
Role of cytoplasmic thioltransferase in cellular regulation by thiol–disulphide interchange	B. MANNERVIK & K. AXELSSON	125–130
Proteolysis of isolated mitochondria by myocardial lysosomal enzymes	R. M. ALLAN & E. WELMAN	139–144
Initiation of fatty acid synthesis in rat mammary glands	P. MARTYN & I. A. HANSEN	171–175
Methane production by the membranous fraction of *Methanobacterium thermoautotrophicum*	F. D. SAUER, J. D. ERFLE & S. MAHADEVAN	177–182
Subcellular distribution and some properties of *N*-ethylmaleimide-sensitive and -insensitive forms of glycerol phosphate acyltransferase in rat adipocytes	E. D. SAGGERSON, C. A. CARPENTER, C. H. K. CHENG & S. R. SOORANNA	183–189
Influence of starvation and clofibrate administration on oxidative phosphorylation by rat liver mitochondria	B. K. A. RASHEED, S. CHHABRA & C. K. R. KURUP	191–198

Cell Surfaces and Receptors

Nucleo-cytoplasmic relationships of oestrogen receptors in rat liver during the oestrous cycle and in response to administered natural and synthetic oestrogen	W. MARR, J. O. WHITE, M. G. ELDER & L. LIM	17–25
Incorporation of L-[^{3}H]fucose and D-[^{3}H]glucosamine into cell-surface-associated glycoconjugates in epidermis of cultured pig skin slices	I. A. KING, A. TABIOWO & R. H. WILLIAMS	65–77

Developmental Biochemistry

Developmental changes in the protein and ribonucleic acid components of rat brain messenger ribonucleic acid–protein particles isolated from free polyribosomes by oligo(dT)–cellulose chromatography — R. M. Elliott, A. N. Davison & L. Lim — **215–223**

Membranes, Transport, Bioenergetics and Photosynthesis

Preparation of resealed pig lymphocyte plasma-membrane vesicles — A. P. Johnstone & M. J. Crumpton — **45–50**

Different turnover of fucose residues in plasma membranes of rat liver and Morris hepatoma 7777 — P. Vischer & W. Reutter — **51–55**

The mechanism of proton translocation driven by the respiratory nitrate reductase complex of *Escherichia coli* — R. W. Jones, A. Lamont & P. B. Garland — **79–94**

Glucagon-stimulated adenylate cyclase detects a selective perturbation of the inner half of the liver plasma-membrane bilayer achieved by the local anaesthetic prilocaine — M. D. Houslay, I. Dipple, S. Rawal, R. D. Sauerheber, J. A. Esgate & L. M. Gordon — **131–137**

Regulation of mitochondrial biogenesis. Occurrence of non-functioning components of the mitochondrial respiratory chain in *Saccharomyces cerevisiae* grown in the presence of proteinase inhibitors: evidence for proteolytic control over assembly of the respiratory chain — A. V. Galkin, T. V. Tsoi & V. N. Luzikov — **145–156**

Contents of Volume 190, No. 2

Protein Biosynthesis/Molecular Genetics

Studies on the assembly of the rat lens capsule. Biosynthesis of a cross-linked collagenous component of high molecular weight — J. G. Heathcote, A. J. Bailey & M. E. Grant — **229–237**

Incorporation of amino acids into soluble and membrane protein fractions of dystrophic hamsters — D. M. Nicholls, R. C. Creasy, M. W. Chin-See, J. A. Carlisle, A. B. Lange & M. Saleem — **341–348**

Metabolism, Regulation and Control Processes

The effect of iodothyronines on the conversion of thyroxine into 3,3′,5-tri-iodothyronine in isolated rat renal tubules — P. Heyma, R. G. Larkins & D. G. Campbell — **239–242**

Synthesis of glycosaminoglycans by human skin fibroblasts cultured on collagen gels — J. T. Gallagher, N. Gasiunas & S. L. Schor — **243–254**

Partial characterization of the polyisoprenoid carrier of *N*-acetylglucosamine in *Glycine max* (soya bean) — C. M. Chadwick & D. H. Northcote — **255–261**

Effect of compound D-600 (methoxyverapamil) on gluconeogenesis and on acceleration of the process by α-adrenergic stimuli in rat kidney tubules — E. D. Saggerson & C. A. Carpenter — **283–291**

The effect of glucagon treatment and starvation of virgin and lactating rats on the rates of oxidation of octanoyl-L-carnitine and octanoate by isolated liver mitochondria — V. A. Zammit — **293–300**

Biosynthesis of chondroitin sulphate by a Golgi-apparatus-enriched preparation from cultures of mouse mastocytoma cells — J. E. Silbert & L. S. Freilich — **307–313**

Regional distribution of the enzymes of haem biosynthesis and the inhibition of 5-aminolaevulinate synthase by manganese in the rat brain — M. D. Maines — **315–321**

A possible mechanism for the anti-ketogenic action of alanine in the rat — R. Nosadini, H. Datta, A. Hodson & K. G. M. M. Alberti — **323–332**

The role of Ca^{2+} in the protoveratrine-induced release of γ-aminobutyrate from rat brain slices — M. C. W. Minchin — **333–339**

Calcium and pancreatic β-cell function. The mechanism of insulin secretion studied with the aid of lanthanum	P. R. Flatt, L. Boquist & B. Hellman	361–372
Polyamine and amino acid content, and activity of polyamine-synthesizing decarboxylases, in liver of streptozotocin-induced diabetic and insulin-treated diabetic rats	M. E. Brosnan, B. V. Roebothan & D. E. Hall	395–403
Cerebral ribosomal protein phosphorylation in experimental hyperphenylalaninaemia	S. Roberts & B. S. Morelos	405–419
Metabolism of adenine nucleotides by ectoenzymes of vascular endothelial and smooth-muscle cells in culture	J. D. Pearson, J. S. Carleton & J. L. Gordon	421–429
The site of cartilage matrix degradation	J. T. Dingle & T. T. Dingle	431–438
Restoration of guanine nucleotide- and fluoride-stimulated activity to an adenylate cyclase-deficient cell line with affinity-purified guanine nucleotide regulatory protein	T. B. Nielsen, R. W. Downs, Jr. & A. M. Spiegel	439–443
Mechanism of bile-pigment synthesis in algae. ^{18}O incorporation into phycocyanobilin in the unicellular rhodophyte, *Cyanidium caldarium*	S. B. Brown, A. J. Holroyd & R. F. Troxler	445–449
Enzymic synthesis of *sym*-homospermidine in *Lathyrus sativus* (grass pea) seedlings	K. S. Srivenugopal & P. R. Adiga	461–464
Prolonged induction of hepatic haem oxygenase and decreases in cytochrome *P*-450 content by organotin compounds	D. W. Rosenberg, G. S. Drummond, H. C. Cornish & A. Kappas	465–468
Lipogenesis in interscapular brown adipose tissue of virgin, pregnant and lactating rats. The effects of intragastric feeding	L. Agius & D. H. Williamson	477–480
Cell Surfaces and Receptors		
A possible role of rabbit heart cytosol tocopherol binding in the transfer of tocopherol into nuclei	C. Guarnieri, F. Flamigni & C. M. Caldarera	469–471
Developmental Biochemistry		
The influence of fluoride administration on the structure of proteoglycans in the developing rat incisor	J. W. Smalley & G. Embery	263–272
High affinity of α-foetoprotein for arachidonate and other fatty acids	R. N. K. Carlsson, T. Estes, J. Degroot, J. T. Holden & E. Ruoslahti	301–305
Liver enzymes of serine metabolism during neonatal development of the rat	K. Snell	451–455
Phosphate utilization and constitutive synthesis of phosphatases in *Thermoactinomyces vulgaris* Tsilinsky	U. Sinha & V. P. Singh	457–460
Membranes, Transport, Bioenergetics and Photosynthesis		
Inhibition of adenosine triphosphatase, 5-hydroxytryptamine transport and proton-translocation activities of resealed chromaffin-granule 'ghosts'	D. K. Apps, J. G. Pryde, R. Sutton & J. H. Phillips	273–282
Energy conservation by the plant mitochondrial cyanide-insensitive oxidase. Some additional evidence	S. B. Wilson	349–360
Nucleoside transport in human erythrocytes. Apparent molecular weight of the nitrobenzylthioinosine-binding complex estimated by radiation-inactivation analysis	S. M. Jarvis, J. D. Young & J. C. Ellory	373–376
Nucleoside transport in human and sheep erythrocytes. Evidence that nitrobenzylthioinosine binds specifically to functional nucleoside-transport sites	S. M. Jarvis & J. D. Young	377–383
The orientation of iron–sulphur clusters in membrane multilayers prepared from aerobically-grown *Escherichia coli* K12 and a cytochrome-deficient mutant	H. Blum, K. Poole & T. Ohnishi	385–393

Alkaline phosphatase activity does not mediate phosphate transport in the renal-cortical brush-border membrane — H. S. TENENHOUSE, C. R. SCRIVER & E. J. VIZEL — 473–476

The interaction between methanol dehydrogenase and the autoreducible cytochromes *c* of the facultative methylotroph *Pseudomonas* AM1 — D. T. O'KEEFFE & C. ANTHONY — 481–484

Contents of Volume 190, No. 3

Protein Biosynthesis/Molecular Genetics

Induction of rat liver metallothionein mRNA and its distribution between free and membrane-bound polyribosomes — S. G. SHAPIRO & R. J. COUSINS — 755–764

Ribosomal resistance to the 12,13-epoxytrichothecene antibiotics in the producing organism *Myrothecium verrucaria* — A. N. HOBDEN & E. CUNDLIFFE — 765–770

Peptide elongation in rat kidney after cadmium administration — M. J. KULISZEWSKI & D. M. NICHOLLS — 791–797

Inhibition of protein synthesis by a toxic lectin from *Viscum album* L. (mistletoe) — F. STIRPE, R. F. LEGG, L. J. ONYON, P. ZISKA & H. FRANZ — 843–845

Protein Turnover

The effects of calcium ions, ionophore A23187 and inhibition of energy metabolism on protein degradation in the rat diaphragm and epitrochlearis muscles *in vitro* — P. H. SUGDEN — 593–603

Diurnal response in endogenous amino acid oxidation of meal-fed rats — R. W. WANNEMACHER, JR. & R. E. DINTERMAN — 663–671

Evidence for heterogeneity of protein-turnover states in cultured cells — J. S. AMENTA & S. C. BROCHER — 673–683

Metabolism, Regulation and Control Processes

Factors influencing palmitoyl-CoA oxidation by rat liver peroxisomal fractions. Substrate concentration, organelle integrity and ATP — J. THOMAS, L. J. DEBEER, P. J. DE SCHEPPER & G. P. MANNAERTS — 485–494

Relationship between acid-soluble carnitine and coenzyme A pools *in vivo* — E. P. BRASS & C. L. HOPPEL — 495–504

Androgenic regulation of messenger RNA in rat epididymis — A. D'AGOSTINO, R. JONES, R. WHITE & M. G. PARKER — 505–512

A high-affinity cytosol binding protein for 1α,25-dihydroxycholecalciferol in the uterus of Japanese quail — N. TAKAHASHI, E. ABE, R. TANABE & T. SUDA — 513–518

Evidence that in chick embryos destruction of hepatic microsomal cytochrome *P*-450 haem is a general mechanism of induction of δ-aminolaevulinate synthase by porphyria-causing drugs — L.-K. LIM, G. SRIVASTAVA, J. D. BROOKER, B. K. MAY & W. H. ELLIOTT — 519–526

Mechanism of formation of the A/B *cis* ring junction of ecdysteroids in *Polypodium vulgare* — T. G. DAVIES, W. J. S. LOCKLEY, R. BOID, H. H. REES & T. W. GOODWIN — 537–544

Tumour calcitonin. Interaction with specific calcitonin receptors — J. HAM, M. L. ELLISON & J. LUMSDEN — 545–550

The effect of fluroxene [(2,2,2-trifluoroethoxy)ethane] on haem biosynthesis and degradation — M. R. ZIMAN, J. J. BRADSHAW & K. M. IVANETICH — 571–580

NADP-specific isocitrate dehydrogenase in regulation of urea synthesis in rat hepatocytes — L. G. PETCU & G. W. E. PLAUT — 581–592

Characterization of cell-surface glycopeptides from mouse cerebral cortex that inhibit cell growth and protein synthesis — R. J. KINDERS, A. G. MILENKOVIC, P. NORDIN & T. C. JOHNSON — 605–614

Insulin stimulates synthesis of soluble proteins in isolated rat hepatocytes	R. L. Clark & R. J. Hansen	615–619
The inactivation of rat adipocyte Mg^{2+}-dependent phosphatidate phosphohydrolase by noradrenaline	C. H. K. Cheng & E. D. Saggerson	659–662
Pyruvate dehydrogenase complex of ascites tumour. Activation by AMP and other properties of potential significance in metabolic regulation	P. A. Lazo & A. Sols	705–710
Huntington's-chorea fibroblasts. Cellular protein glycosylation	W.-Y. Hung, D. E. Mold & A. Tourian	711–719
Isotope-dilution analysis of the effects of deoxyguanosine and deoxyadenosine on the incorporation of thymidine and deoxycytidine by hydroxyurea-treated thymus cells	F. W. Scott & D. R. Forsdyke	721–730
Regulation of *S*-adenosylmethionine decarboxylase by polyamines in Ehrlich ascites-carcinoma cells grown in culture	L. Alhonen-Hongisto	747–754
Activation of oxoglutarate dehydrogenase in the kidney in response to acute acidosis	M. Lowry & B. D. Ross	771–780
Transcriptionally active RNA polymerases from Morris hepatomas and rat liver. Elucidation of the mechanism for the preferential increase in the tumour RNA polymerase I	B. W. Duceman & S. T. Jacob	781–789
The effect of calmodulin on the active calcium-ion transport and (Ca^{2+} + Mg^{2+})-dependent ATPase in microsomal fractions of smooth muscle compared with that in erythrocytes and cardiac muscle	F. Wuytack, G. De Schutter & R. Casteels	827–831
Cellular uptake of retinoic acid *in vitro*	C. K. Banerjee & B. P. Sani	839–842
Spontaneous lysosomal enzyme secretion by a murine macrophage-like cell line	W. Jessup & R. T. Dean	847–850
Desaturation of linoleic acid from exogenous lipids by isolated chloroplasts	A. V. M. Jones & J. L. Harwood	851–854

Cell Surfaces and Receptors

The effects of oestrogens and progestogens on oestrogen receptors in female rat liver	W. Marr, M. G. Elder & L. Lim	563–570
A comparison of the relationships between progestin receptors and oestrogen receptors in neural and non-neural target tissues of the rat during the oestrous cycle	S. Thrower & L. Lim	691–695
Binding of concanavalin A to isolated hepatocytes and its effect on uptake and degradation of asialo-fetuin by the cells	H. Tolleshaug, M. Abdelnour & T. Berg	697–703
ATP-dependent activation of glucocorticoid receptor from rat liver cytosol	V. K. Moudgil & J. K. John	799–808
Interaction of rat liver glucocorticoid receptor with adenosine 5′-triphosphate. Characterization of interaction by use of ATP–Sepharose afinity chromatography	V. K. Moudgil & J. K. John	809–818
Unoccupied nuclear oestrogen receptors in the female rat hypothalamus. Increases on oestrogen administration	J. O. White & L. Lim	833–837

Developmental Biochemistry

High-pressure liquid chromatographic analysis of anaerobic photoproducts of bilirubin-IXα *in vitro* and its comparison with photoproducts *in vivo*	S. Onishi, N. Kawade, S. Itoh, K. Isobe & S. Sugiyama	527–532
Demonstration of a geometric isomer of bilirubin-IXα in the serum of a hyperbilirubinaemic newborn infant and the mechanism of jaundice phototherapy	S. Onishi, K. Isobe, S. Itoh, N. Kawade & S. Sugiyama	533–536
Some studies on the composition and surface properties of oil bodies from the seed cotyledons of safflower (*Carthamus tinctorius*) and linseed (*Linum ustatissimum*)	C. R. Slack, W. S. Bertaud, B. D. Shaw, R. Holland, J. Browse & H. Wright	551–561

Changes in the surface membrane during myoblast fusion	D. H. CURTIS, K. J. MICKLEM, K. GILL & C. A. PASTERNAK	**647–652**
Role of adrenaline and cyclic AMP in appearance of tyrosine aminotransferase in perinatal rat liver	A. V. GHISALBERTI, J. G. STEELE, M. H. CAKE, M. C. MCGRATH & I. T. OLIVER	**685–690**
Membranes, Transport, Bioenergetics and Photosynthesis		
Permeability of lactating-rat mammary gland Golgi membranes to monosaccharides	M. D. WHITE, N. J. KUHN & S. WARD	**621–624**
Components involved in virally mediated membrane fusion and permeability changes	A. M. WYKE, C. C. IMPRAIM, S. KNUTTON & C. A. PASTERNAK	**625–638**
Survey of virally mediated permeability changes	K. A. FOSTER, K. GILL, K. J. MICKLEM & C. A. PASTERNAK	**639–646**
Organic-acid transport in resealed haemoglobin-containing human erythrocyte 'ghosts'	A. R. HUBBARD, U. SPRANDEL & R. A. CHALMERS	**653–658**
Bile-salt inhibition of sodium ion-coupled D-glucose and L-alanine accumulation by brush-border-membrane vesicles from hamster jejunum	R. C. BEESLEY & R. G. FAUST	**731–736**
Asymmetric distribution of cytochrome *P*-450 and NADPH–cytochrome *P*-450 (cytochrome *c*) reductase in vesicles from smooth endoplasmic reticulum of rat liver	M. B. COOPER, J. A. CRAFT, M. R. ESTALL & B. R. RABIN	**737–746**
Distribution of secretory component in hepatocytes and its mode of transfer into bile	B. M. MULLOCK, R. H. HINTON, M. DOBROTA, J. PEPPARD & E. ORLANS	**819–826**
